

communiMap

What is communiMap?

It's a downloadable app that gives you a space to reflect and share what you observe in your local space. Your contributions become part of a shared map—helping communities learn, connect, and better understand how people and place are changing.

Together, we're building a resource for learning, care, and connection—one page, one sighting, one moment at a time.

Why not fill in this sheet to get involved? You can email or post it to us!

Who Lives in the Compost?

A compost heap is a perfect home for lots of different creatures, that help break down food and garden waste into rich, healthy soil! We can then use this soil for growing new plants, including fruits and vegetables.

Draw the creatures you think might be living in a compost heap.

Your Challenge:

Write an acrostic poem where each line begins with one letter from the word GALLANT. Think about what it means to care for your community and your environment. What does bravery, kindness, or standing up for nature look like to you?

Can you add some wildlife to this scene? What creatures do you think live here? Would any people be using this space?

communiMap

communiMap is a project created and delivered by GALLANT, a project led by the University of Glasgow and funded by the Natural Environment Research Council (NERC).
